- V. Discussion of the upcoming year focus for the committee

 Jody Bauer started the discussion by handing out a summary
 of the Strategic Plan and asking those at the meeting what
 the focus should be for the coming year.

It was stated that the need for scheduling courses around our interactive technology is needed. The feeling is that some technology rooms are underutilized. Many ENGL courses are teaching student s how to use technology. It was noted that we did review scheduling in the past. A reminder that we must maintain our ADA accommodations in these technology rooms. We should try to avoid the "scramble" that is the practice of room assignments. We were reminded that students need to be informed of room changes after the start of a term. Is the future of our

Community College of Philadelphia

classrooms more desktops or is it BYOD? What about WiFi and Tablets? Should we explore giving students a device?

We will continue to build Smart Classrooms
A discussion concerning Smartboards vs Cleartouch devices.
Faculty need training videos on using the technology in the smart rooms. It is available from FLOAT.

If students are given technology does that put pressure on faculty to use technology? Yes

Jody agreed to find the notes from the previous year about these topics and provide to the committee.

We need to keep in mind that students need to understand the appropriate use of technology.

Admissions and coding students to a process was discussed as a way to ensure an improved student experience.

As the College brings new technology onboard we should be conveying to faculty and staff how they can use it to improve student success. Perhaps a college-wide campaign on the technology available. Change the culture to one of technology focus.
